

Deepdale

Acer platanoides 'Emerald Queen'

Norway Maple

Container Grown 30-35 cm girth in summer

A hardy fast growing large deciduous tree *Acer platanoides* 'Emerald Green' has a good upright form with a dense, symmetrical, rounded to oval crown making it ideal for avenue and urban planting. The bark is beautifully patterned with vertical and interlaced ridges.

Clusters of yellow-green scented flowers appear on bare branches in spring before the leaves appear followed by green winged fruits.

The large five lobbed leaves very like the stylized Maple Leaf on the Canadian flag are bright green throughout the summer and turn a butter yellow in the autumn occasionally finishing with orange. The effect becomes more and more spectacular as the tree grows to maturity due to the size of the tree.

Field Grown 30-35 cm girth in Autumn

Plant Profile

Name:	Acer Platanoides 'Emerald Queen'
Common Name:	Norway Maple
Family:	Sapindaceae
Height:	Over 20 metres
Width:	up to 18 metres
Demands:	Full Sun / Partial shade
Soil:	Chalk, Clay, Sand or Loam
Foliage:	Deciduous
Hardy:	Sun, Frost and wind resistant

Deepdale

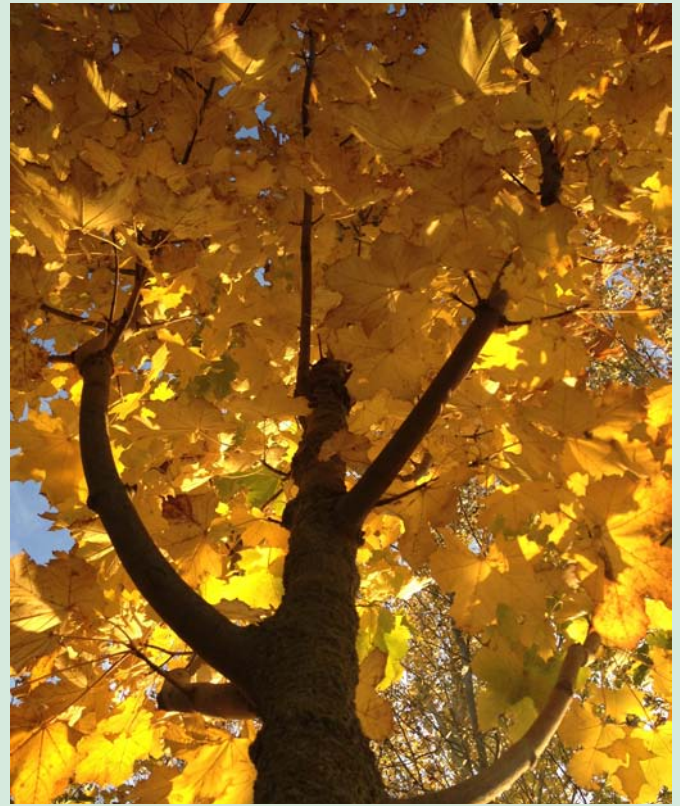

Acer platanoides 'Emerald Queen'

Norway Maple

Deepdale

The bare ground found under the tree is due to it releasing chemicals that discourage undergrowth including sapling growth.

Butter Yellow foliage in Autumn

Large field grown 70-80cm girth

Winter – 20-25 field grown
