

Enkianthus campanulatus

Redvein Enkianthus

2.5-3m Enkianthus campanulatus

A spreading deciduous shrub *Enkianthus campanulatus* which originates from countries in North East Asia has two notable seasons.

As well as being renowned for its Autumn colour in early summer it produces pendulous clusters of delicate, bell shaped, cream to pink flowers of around half an inch in length with darker pink margins in a raceme that number up to 15.

In autumn, the elliptic shaped, mid green leaves up to 2in long and 1in wide that are clustered at the end of the twigs turn flaming shades of orange and red.

This pretty shrub is perfect for shady, woodland edge and gives its most brilliant autumn display on acid soil, so will plant well alongside rhododendrons.

Flowers of the Enkianthus campanulatus

Plant Profile

Name:	<i>Enkianthus campanulatus</i>
Common Name:	Red Vein Enkianthus
Family:	Ericaceae
Height:	4.5m
Width:	4.5m
Demands:	Prefers Partial Shade but will take Full Sun
Soil:	Moist but well drained acidic soils
Foliage:	Deciduous
Flower:	Small bell shaped yellowish flowers with red veins and markings

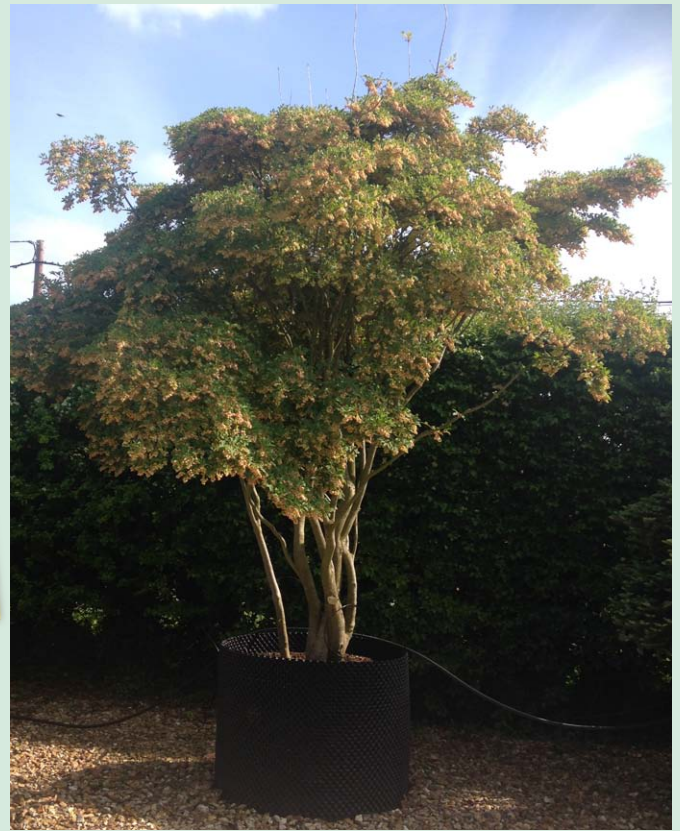

Enkianthus campanulatus

Redvein Enkianthus

Deepdale

Enkianthus comes from the Greek 'enkyos' meaning pregnant and 'Anthos' meaning a flower. *campanulatus* comes from the Greek meaning bell-shaped in reference to the shape of the flowers.
